Subject: New regulation for travelers

To Whom It May Concern:

As I read about the proposed regulations for travelers, I felt outraged and sick. The imposition of government "security" measures makes life in America increasingly reminiscent of police states set up by paranoid dictators. Our precious freedoms and privacy erode daily, not because of our mistakes, but because of government dereliction. As Benjamin Franklin said: " Those who give up their liberties in exchange for security deserve neither and will lose both." Please just leave us alone.
